Kindergarten is in need of plastic lids. Plastic lids from coffee cans, margarine tubs, premade dip containers, cottage cheese, or yogurt lids are a few ideas. We are collecting the lids through the month of October. The lids will be used to create Christmas ornaments for our tree at the Brookfield Zoo.

“Whatever You Do”

From the Principal’s Desk

The final “R” is ‘rithmetic (better known today as math). At Immanuel, we learn our addition and subtraction tables. We learn multiplication and division facts too! But most importantly, we learn math skills that will help us in daily life. Math is certainly more than just numbers. We learn to use our minds to logically solve problems.

How can you support learning at home? There are two ways that you can make a difference. First, take time to practice the basic math facts. If your child can easily recall addition, subtraction, multiplication, and division facts, more complicated math calculations can become manageable. Imagine long division without a mastery of subtraction and multiplication! Secondly, make math real life. Use real life opportunities to use math skills. For example, have your child estimate the amount of change they should receive from a transaction. Shopping is a wonderful way to practice math skills. Ask questions. How much more money would you need to be able to make the purchase? What would the sale price be? Math can also occur in the kitchen. Children can help with measurement in cooking. What would you need if you doubled the recipe or made only half? Children are never too young to learn budgeting. How much of the allowance will be saved? Spent? Given as offering? These are only a few ideas. How can you make math real life?

In Christ,
Lana J. Hahn
